Welcome to the Family!

Take Your Sales to the Summit with Vertical!

Vertical Summit – Communications for the Upwardly Mobile

The family of Vertical Summit™ Unified Communications systems offers advanced VoIP technology, low cost SIP trunking, on/off premise mobility and remote connectivity in a cost-effective, hybrid IP/TDM platform. With the Summit, small and mid-size businesses can easily migrate from analog to IP and expand their communications and collaboration capabilities as they grow.

Available in two models, the Vertical Summit (for 5-50 users) and the Summit 800 (for 50-800 users) offer flexible, easy to use GUI-based system configuration, with simple click and tap access to advanced UC and mobility applications for desktops and smartphones.
